Introduction 00000

Section I Subsection I

- **1** Introduction Starters

• Lots of career planing classes

- Lots of career planing classes
- Heard of the importance of career planing

- Lots of career planing classes
- Heard of the importance of career planing
- Many people attach great importance to it

Introduction

- Lots of career planing classes
- Heard of the importance of career planing
- Many people attach great importance to it

Dose it really work?

Section I Subsection II

- **1** Introduction Info

Is career planing really correlated with career success?

000000

- Discover the relationship between career planing and career success
- Help students to understand whether it is important to have career planing

Methods 000000

2 Methods

Methods

• Literature study

- Literature study
- Send Questionnaire

Methods

- Literature study
- Send Questionnaire
- Data analysis

Section II Subsection I

- 2 Methods Survey

Sample Size

Valid Questionnaires: 40 Total Questionnaires: 42

Evaluation of Career Planing

- Have you ever thought about what kind of occupation you want to go in for in the future?(eg. I want to pursue a career in biology, physics or linguistics)
- 2 You feel that your planning is manageable and doable. Besides, you are confident on the career planning and will not give up in a short period of time. (eg.some students major in bioengineering are quite confused with their future planning)
- 3 You know exactly what you are eager to do and is able to generalize what it is in one sentence or you have no idea about the specific jobs but have a sketch of what to do in the future (eg.I want to be a police to successfully thwart a gang of drug traffickers)

Evaluation of Career Planing

- 4 You're considerably clear about what skills you should grasp so as to achieve your goal
- 5 In order to grasp those skills discussed above, you have a well-planned scheme of learning (eg. I have to grasp A in this semester or have a proficient command of B in the duration of your undergraduate stage)
- 6 The learning scheme mentioned above has become an indispensable part of your daily life, which makes you energetic and have a sense of fulfillment as well as getting closer to your target.

Evaluation of Academic Performance

- 7 Objectively speaking, if asked to grade yourself according to your academic performance, which choice below is the best one that conforms to your self-estimation?:
 - A Excellent, I'm the king.
 - B Good enough but not perfect
 - Not that good but acceptable
 - There is a long way to go
 - Terrible, I don't want to mention that
 - Sorry, life is hard

Section III

Conclusion

- 3 Results

Horizontal Analysis

• In Figure 1, top students are highly possible to have a good career plan.

- In Figure 1, top students are highly possible to have a good career plan.
- In Figure 6, the students who are not good at study are not good at career plan either.

Horizontal Analysis

- In Figure 1, top students are highly possible to have a good career plan.
- In Figure 6, the students who are not good at study are not good at career plan either.
- In Figures 2 to 5, the students in the middle do not show a clear tendency.

Longitudinal Analysis

• In Figure 7, the students with the worst career planing perform poorly in academic.

Longitudinal Analysis

- In Figure 7, the students with the worst career planing perform poorly in academic.
- In Figures 8 and 9, there is no obvious tendency.

Longitudinal Analysis

- In Figure 7, the students with the worst career planing perform poorly in academic.
- In Figures 8 and 9, there is no obvious tendency.
- In Figures 10 to 12, the students with the best career planing perform pretty well in academic.

Conclusion of Previous Studies

• Self-efficacy expectations are related to indices of academic performance behavior as well as vocational interest and range of perceived career options.[1]

Conclusion of Previous Studies

- Self-efficacy expectations are related to indices of academic performance behavior as well as vocational interest and range of perceived career options. 1
- A career planing course does have a positive impact on academic performance. 2

Conclusion of Previous Studies

- Self-efficacy expectations are related to indices of academic performance behavior as well as vocational interest and range of perceived career options. 1
- A career planing course does have a positive impact on academic performance. 2
- A systematric advisement system would enhance opportunities for student academic success. 3

- 4 Discussion
- **5** Strengths and Weaknesses

Section IV Subsection I

- 4 Discussion Our Findings

- Excellent or terrible ⇒ Strongly positively correlated
- Others \Rightarrow No explicit correlation

- 4 Discussion Further Discussion

• No Inferiority

- No Inferiority
- No Superiority

- No Inferiority
- No Superiority
- A Good Choice (hope and motivation)

- No Inferiority
- No Superiority
- A Good Choice (hope and motivation)
- Reconsider

Section V

- **6** Strengths and Weaknesses

Section V Subsection I

- **5** Strengths and Weaknesses Strengths

Strengths

• Large sample size

Strengths

- Large sample size
- Comprehensive evaluation

Strengths.

- Large sample size
- Comprehensive evaluation
- Quantitative analysis

Strengths

- Large sample size
- Comprehensive evaluation
- Quantitative analysis
- Practical significance

- **5** Strengths and Weaknesses Weaknesses

Weaknesses

Why no explicit correlation in the middle? (In Section 1)

Reasons Behind

• Academic performance evaluation \Rightarrow compartively subjective

Weaknesses

Why no explicit correlation in the middle? (In Section 1)

Reasons Behind

- Academic performance evaluation \Rightarrow compartively subjective
- Career planing evaluation \Rightarrow compartively objective (scales)

Weaknesses

Why no explicit correlation in the middle? (In Section 1)

Reasons Behind

- Academic performance evaluation \Rightarrow compartively subjective
- Career planing evaluation \Rightarrow compartively objective (scales)
- Each person has his own standards
